SUMMARY

Principal AI Engineer with 8+ years building production ML and agentic systems. Currently lead Xurrent's AI Engineering team and own end-to-end delivery of the company's customer-facing AI platform — agentic ITSM suite (AI Studio, 7 agents/28 skills), multi-tenant MCP server architecture, conversational agent (SERA AI V2), IT-operations agent (ARIA), and autonomous SRE agents (IMR). Track record taking research prototypes to revenue-generating products (\$1M+ ARR; \$300K+ in engineering savings). Postgraduate in AI & Data Science from Loyalist College, Toronto, Canada; TensorFlow Developer (Google) and Azure Data Scientist Associate (Microsoft) certified.

TECHNICAL SKILLS

Languages: Python, SQL, Java, Bash

ML & Deep Learning: Transformers, PyTorch, TensorFlow, Keras, ONNX, Hugging Face, GPU optimization, MLflow

LLM & Agentic Systems: LangGraph, LangChain, LangSmith, LlamaIndex, MCP / FastMCP, RAG, multi-agent orchestration, RLHF, human-in-the-loop, MLOps, Generative AI

Retrieval: ColBERTv2, FAISS, OpenSearch, Pinecone, ChromaDB, BM25 + KNN hybrid search, cross-encoder

LLM Providers: AWS Bedrock (Claude), OpenAI, Anthropic, Groq, Ollama

Backend & APIs: FastAPI, Django, Flask, Streamlit, PySpark

Infra & MLOps: Docker, ECS, Airflow, Git/GitLab CI/CD, Locust (load testing), OpenTelemetry, Grafana

Cloud: AWS (Bedrock, ECS, Lambda, VPC), Azure, GCP

Databases: PostgreSQL, MySQL, MongoDB, Redis; Vector DBs (OpenSearch, FAISS, Pinecone, Chroma)

EXPERIENCE

Principal Engineer — Lead AI (Acting Head of AI)

Jan 2026 – Present

Xurrent | Bangalore, India

- Own AI strategy and end-to-end platform delivery at Xurrent — building AI into a strategic differentiator in the company's enterprise ITSM motion against ServiceNow Now Assist and Freshservice Freddy AI.
- Shipped Xurrent AI Studio, the company's flagship customer-facing agentic ITSM platform (7-agent lifecycle suite, 28-skill catalog, 4-mode autonomy with tighten-not-loosen Account → Service → Team scoping, and enterprise guardrails) — now a key feature in enterprise sales, contributing to ~\$2M+ in influenced ARR and 5+ enterprise renewals in the first two quarters post-launch.
- Designed and own Xurrent's production FastMCP Python server powering external AI integrations — dual-mode auth (PAT + OAuth2.1/PKCE), multi-tenant context routing, hybrid native + MCP tool registry; hardened with layered WAF, rate-limiting, and OpenTelemetry observability.
- Built SERA AI V2, a graph-based conversational ITSM agent (LangGraph + OpenSearch + AWS Bedrock) with confidence-gated template resolution, slot-filling, and graceful low-confidence degradation — delivering 3× lower latency and 45% higher accuracy than V1.
- Shipped IMR SRE Agents (autonomous incident-response with multi-signal alert correlation, hypothesis-driven investigation, runbook RAG, and Zenduty MCP) and ARIA (customer-facing Slack agent for end-to-end IT access provisioning) — cutting mean-time-to-investigation from 30 min to 90 sec and ~60% alert noise reduction.

Senior Staff ML Engineer — IC

Nov 2024 – Jan 2026

Automation Anywhere Inc. | Bangalore, India

- Architected an Agentic-AI RCA platform integrated into the Automation360 suite — cut average incident resolution time 45% and saved ~\$300K annually in engineering productivity.
- Built a LangGraph multi-agent pipeline orchestrating OpenAI, Anthropic, Groq, AWS Bedrock, and Ollama backends; modular agents for log parsing, stack-trace analysis, source-code inspection, fault localization, fix generation, and auto PR + JIRA creation, with human-in-the-loop checkpoints.
- Implemented a hybrid retrieval stack (ColBERTv2 + FAISS + cross-encoder reranker) powering the RCA agents; delivered a 3× increase in L4/L5 support team efficiency and 60% faster triage.
- Drove platform UX for dynamic agent configuration, agent personalities, and knowledge-base linking — enabling non-AI teams to spin up new agentic workflows without engineering involvement.

Associate Manager — AI

Nov 2021 – Oct 2024

Detect Technologies Pvt Ltd | Toronto, ON, Canada

- Led a 12-engineer ML/AI team, owning product design and system architecture for the industrial ML stack.

- Took a hydrogen-wastage optimization research prototype (refinery efficiency) to a production product driving \$1M+ in annual revenue.
- Built a multi-agent FAQ RAG system on open-source Llama-3 with a vector DB, using LlamaIndex and LangChain — productionized for industrial domain knowledge retrieval.
- Designed a scalable image-annotation pipeline for ML training data, achieving a 28% throughput gain in model-build turnaround.

Machine Learning Engineer — Research Co-op

Jan 2024 – Apr 2024

Aleafia Health | Toronto, ON, Canada

- Built an OCR layer (Azure Document Intelligence) extracting structured fields from vendor invoices, feeding a Django-based Employee Expense Report tool.
- Layered a RAG-based LLM system on top of extracted invoice content to generate insights and validate vendor records, automating manual review.

Data Scientist — Research Co-op

May 2023 – Aug 2023

Loblaw Companies Limited | Brampton, ON, Canada

- Built a BERT-based NLP pipeline for weekly-flyer content analysis, powering Loblaw's promotional-optimization model with production-grade reporting.
- Surfaced 15% market-share opportunities through promotional-mix analysis, contributing to \$1.5M in identified revenue.

Data Analyst

Dec 2019 – Oct 2021

Jean Martin Systems Ltd | Chennai, India

- Researched and built the codebase for AI-driven product prototyping — reusable components for data preprocessing, model training, and evaluation supporting internal R&D and client delivery.
- Automated client workflows with AI-driven solutions, reducing manual effort and lifting project profitability ~40%.

Graduate Engineer Trainee

Nov 2018 – Oct 2019

Bharat Petroleum Corporation Ltd | Bangalore, India

- Acted as a data analyst on the regional sales team — gathered, cleaned, and interpreted sales data; built dynamic dashboards and analytical reports (Excel, Tableau) supporting regional sales decisions and trend analysis.

EDUCATION

Ontario College Post-Graduation, AI and Data Science — Loyalist College, Toronto, ON, Canada | 2022 – 2024 | CGPA 3.74

B.Tech, Mechanical Engineering — SRM College of Engineering, Chennai, India | 2014 – 2018 | CGPA 3.4

OPEN SOURCE CONTRIBUTIONS

AutoPilotML — Open-Source AutoML Library | Sep 2023 – Present | 29K+ PyPI downloads

Production-ready automated ML library published on PyPI (pip install autopilotml) — end-to-end pipeline covering preprocessing, model selection, clustering, statistical modeling, and training with XGBoost and MLflow integration.

CERTIFICATIONS

TensorFlow Developer Certification — Google (2024) • Azure Data Scientist Associate — Microsoft (2024) • Azure AI Fundamentals — Microsoft (2019)
